**MATHEMATICS FOR AUSTRALIA 11**  
**General Mathematics**

First edition - 2023 fifth reprint

The following erratum was made on 08/Jul/2024

page 79 SECTION 3F Interest explanation should read:

---

**INTEREST**

Each month, cardholders receive a statement listing the purchases made in the last 30 days. If the purchases are paid for within 25 days of the statement date, no interest is paid on the purchases.

If purchases are not paid within 25 days of the statement date, the cardholder is charged interest from the **end of the interest free period**. Interest is charged on the daily balance until the item is paid for.

## MATHEMATICS FOR AUSTRALIA 11

### General Mathematics

First edition - 2019 fourth reprint

The following errata were made on 14/Jul/2023

page 79 SECTION 3F Interest explanation and Example 18 should read:

#### INTEREST

Each month, cardholders receive a statement listing the purchases made in the last 30 days. If the purchases are paid for within 25 days of the statement date, no interest is paid on the purchases.

If purchases are not paid within 25 days of the statement date, the cardholder loses the benefit of the interest free period and is charged interest from the **end of the interest free period**. Interest is charged on the daily balance until the item is paid for.

#### Example 18

Jessarose purchased a laptop for \$450 on June 15. She used her Visa card with interest rate 16.9% p.a. Her statement showing this purchase arrives on June 27, and she is given 25 days until July 22 to pay the balance without any interest charges.

- a What is the effective “interest free” period on the laptop?
- b Calculate the interest charged if she pays the balance:
  - i before July 22
  - ii on July 25.

- a Remainder of June:  $30 - 15 = 15$  days  
     July:                    = 22 days  
     Effective interest free period = 37 days

- b i If the \$450 is paid before July 22, no interest is charged.
- ii If the \$450 is paid on July 25, interest is charged from July 22.  
     Interest =  $\$450 \times 0.169 \times \frac{3}{365}$       {July 22 - July 25 = 3 days}  
     = **\$0.63**

page 441 ANSWERS EXERCISE 3F.1 questions 1 b ii, 2, 3 b, and 4 should read:

- 1 a September 22    b i \$0    ii \$2.76
- 2 \$268.70
- 3 a i 36 days    ii 30 days    b i \$0.43    ii \$0.04
- 4 \$2715.00

page 441 ANSWERS REVIEW SET 3A question 8 b should read:

- 8 a i 39 days    ii 35 days    b i \$0.49    ii \$0.75

page 441 ANSWERS REVIEW SET 3B questions 7 b ii and iii should read:

- 7 a 38 days    b i \$0    ii \$0.12    iii \$0.74

### General Mathematics

First edition - 2017 third reprint

The following errata were made on 23/Nov/2018

page 344 EXERCISE 12C question 5 d should read:

**5 d** Find the life expectancy of an Australian female who smokes 25 cigarettes per day.

page 441 ANSWERS EXERCISE 3D.1 question 4 b should read:

**4 a** \$2.48      **b** \$2.05

page 442 ANSWERS EXERCISE 4F.1 questions 1 b and 5 should read:

**1 a** \$1444.50    **b** \$237.96    **c** \$3734.90    **2** \$279  
**3 a** \$1229.54    **b**  $\approx 9.44\%$     **4**  $\approx 40.3\%$     **5** \$2.43

page 443 ANSWERS EXERCISE 5D.2 question 10 b should read:

**10 a** Tasty biscuits saving should be 37 cents.    **b** \$3.32

page 443 ANSWERS REVIEW SET 5B question 5 a should read:

**5 a** **a** \$98.03    **b** \$7.20

page 448 ANSWERS EXERCISE 9A.2 question 2 a should read:

**2 a** Select 5 random numbers between 1 and 366 inclusive. For example, March 5, October 2, July 21, June 13, January 20.

page 463 ANSWERS EXERCISE 13E.1 question 1 c should show correct function plot:

**1 a** 100 grams  
**b i**  $\approx 131$  g      **ii**  $\approx 197$  g      **iii**  $\approx 507$  g

page 466 ANSWERS EXERCISE 14E question 5 a should read:

**5 a** **C** = cost matrix      **I** = income matrix  

$$= \begin{bmatrix} 85 & 120 & 130 \end{bmatrix} \quad = \begin{bmatrix} 125 & 195 & 225 \end{bmatrix}$$

**N** = numbers matrix

$$= \begin{bmatrix} 15 & 12 & 13 & 11 & 14 & 16 & 8 \\ 4 & 3 & 6 & 2 & 0 & 4 & 7 \\ 3 & 1 & 4 & 4 & 3 & 2 & 0 \end{bmatrix}$$

Profit = \$7125 for the week

page 312 REVIEW SET 10A question 3 c should read:

3 Find  $x$ :

The following erratum was made on 15/May/2018

page 37 ROUNDING OFF TO SIGNIFICANT FIGURES Remove DEMO icon at top right of page:

### ROUNDING OFF TO SIGNIFICANT FIGURES

To round off to  $n$  significant figures, we look at the  $(n + 1)$ th digit.

- If it is 0, 1, 2, 3, or 4 we do not change the  $n$ th digit.
- If it is 5, 6, 7, 8, or 9 we increase the  $n$ th digit by 1.

We delete all digits after the  $n$ th digit, replacing by 0s if necessary.

The following errata were made on 27/Feb/2018

page 434 REVIEW SET 15A question 7 should be a directional network:

7 Find the longest path from A to G in the network given.

page 456 ANSWERS EXERCISE 11A question 4 instead of mentioning "quadrant 2" should read:

- 4 a For an obtuse angle, the point P on a unit circle will be to the left of the  $y$ -axis, where all  $x$ -coordinates are negative.  
 $\therefore$  the cosine of an obtuse angle is negative.
- b For an obtuse angle, the point P on a unit circle will be above the  $x$ -axis, where all  $y$ -coordinates are positive.  
 $\therefore$  the sine of an obtuse angle is positive.

page 30 CHAPTER 2 SECTION A should cite correct URL:

For more information on SI units, visit [www.bipm.org/en/publications/si-brochure/](http://www.bipm.org/en/publications/si-brochure/)

The following erratum was made on 24/May/2016

page 340 CHAPTER 12 SECTION B should plot the correct points:

## B GRAPHING LINEAR RELATIONSHIPS

A table of values can only display a small number of the possible values for each variable. To see a more complete picture of the relationship, we can plot the possible values on a **graph**.

For Ted's taxi service in the **Opening Problem**, the independent variable *distance travelled* is on the horizontal axis, and the dependent variable *cost* is on the vertical axis.

Using the table of values, we can plot the points  $(0, 5)$ ,  $(1, 7)$ ,  $(2, 9)$ ,  $(3, 11)$ , and  $(4, 13)$ .

Since the variables are linearly related, we can draw a **straight line** through the points.

We can use the graph to find values of the variables not given in the table. For example, the cost of a 3.5 km ride is \$12.
